### **Introduction**

This instruction manual provides step-by-step guidance for assembling your Lego Home, complete with a functioning light and decorative plant. No prior experience or tools are required. This set is suitable for children aged 5 and above.

# HAZARD WARNING: CHOKING HAZARD

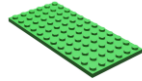

This set contains small Lego pieces. To prevent accidental ingestion and potential choking, keep these pieces away from young children and small animals.

## Required Pieces

### House Components

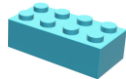

- **Base:**

- 1 × 12x6 flat base plate

- **Wall Structure:**

- 31 × 2x4 bricks

- 1 × 2x3 bricks

- 1 × 4x2x3 high (window)

- 1 × 1x4x6 high (door)

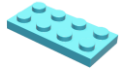

- 1 × 2x1 male connector piece

- 2 × 2x6 flat pieces

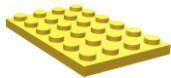

- 2 × 2x4 flat pieces

- 2 × 2x2 flat pieces

- 1 × 4x6 flat piece

### **Railing Components**

- 6 × 1x2 railing pieces

### **Light Components**

- 1 × 1x1 connector piece

- 1 × stud

- 1 × slant piece

- 1 × 2x1 flat piece

### **Flower Components**

- 1 × cross flat piece

- 2 × 1x1 connector pieces

- 4 × slant pieces

- 1 × leaf piece

- 1 × center flower piece

- 1 × stud

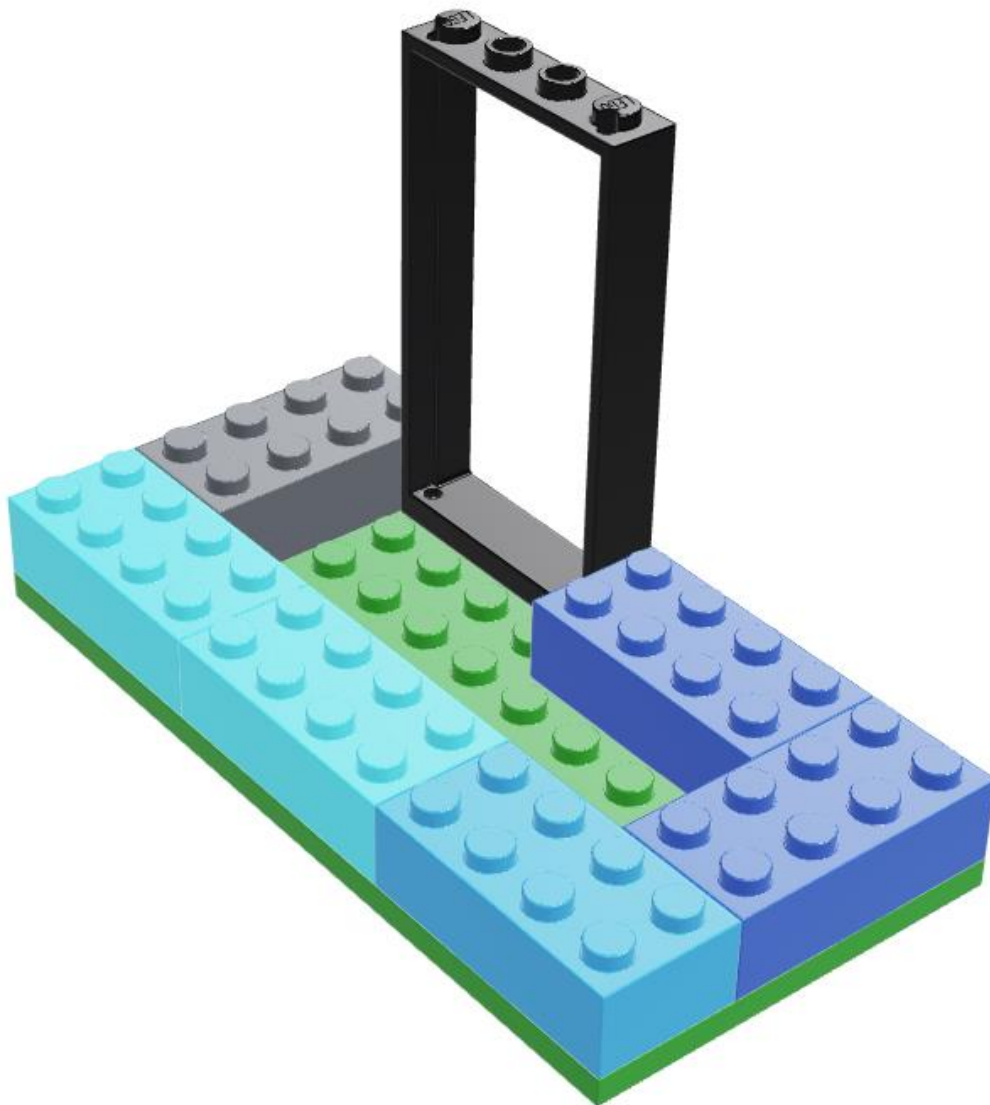

### Step 1: Prepare the Base

Place the 12x6 flat base plate in front of you lengthwise. Position the door piece two tiles from the right edge.

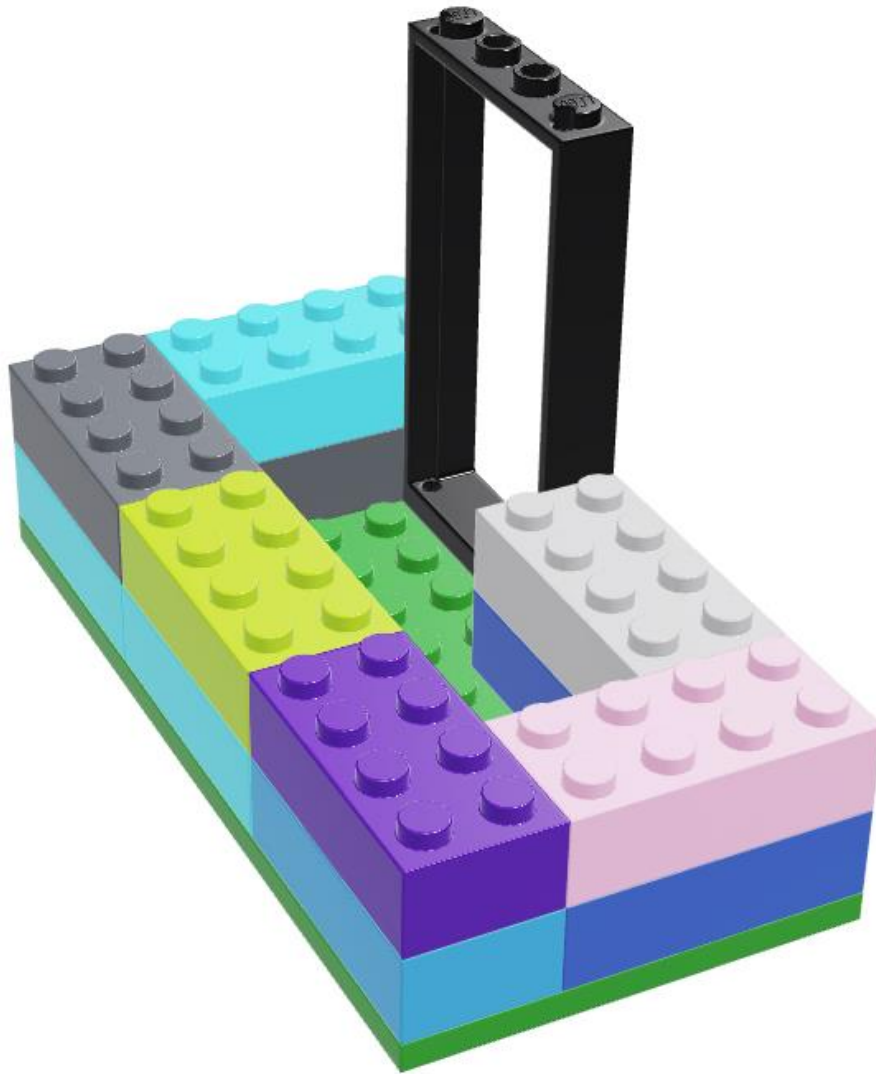

## Step 2: Build the First Wall Layer

Use 2x4 bricks to create the first layer of walls around the base.

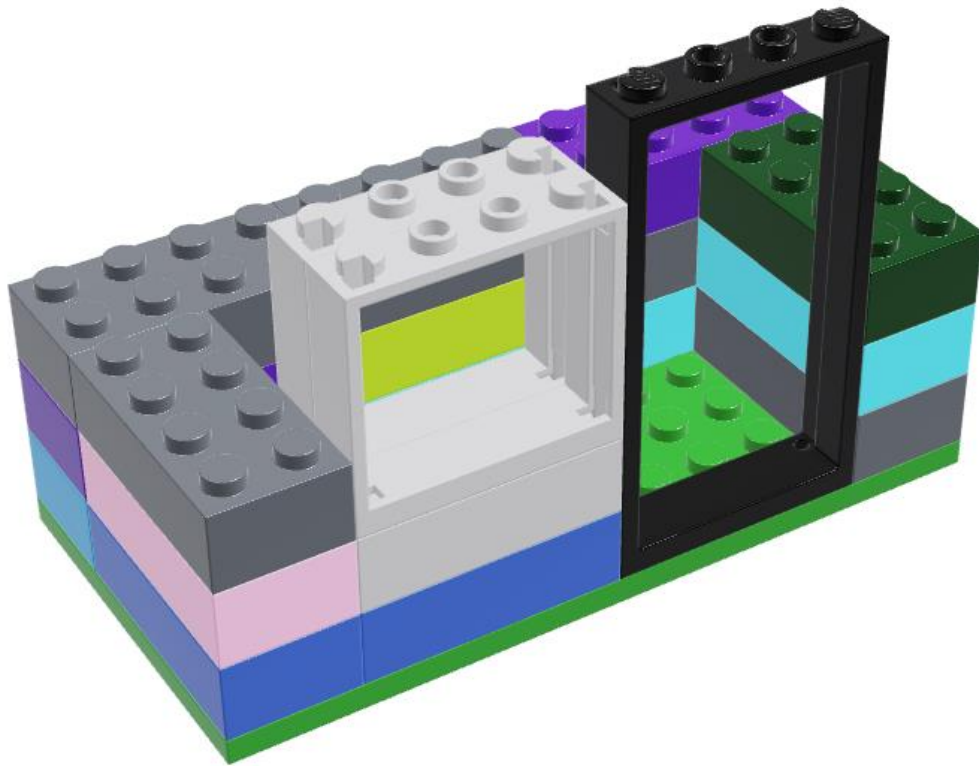

### Step 3: Build the Second Wall Layer

Repeat Step 2 to add a second layer of 2x4 bricks.

#### Step 4: Install the Window

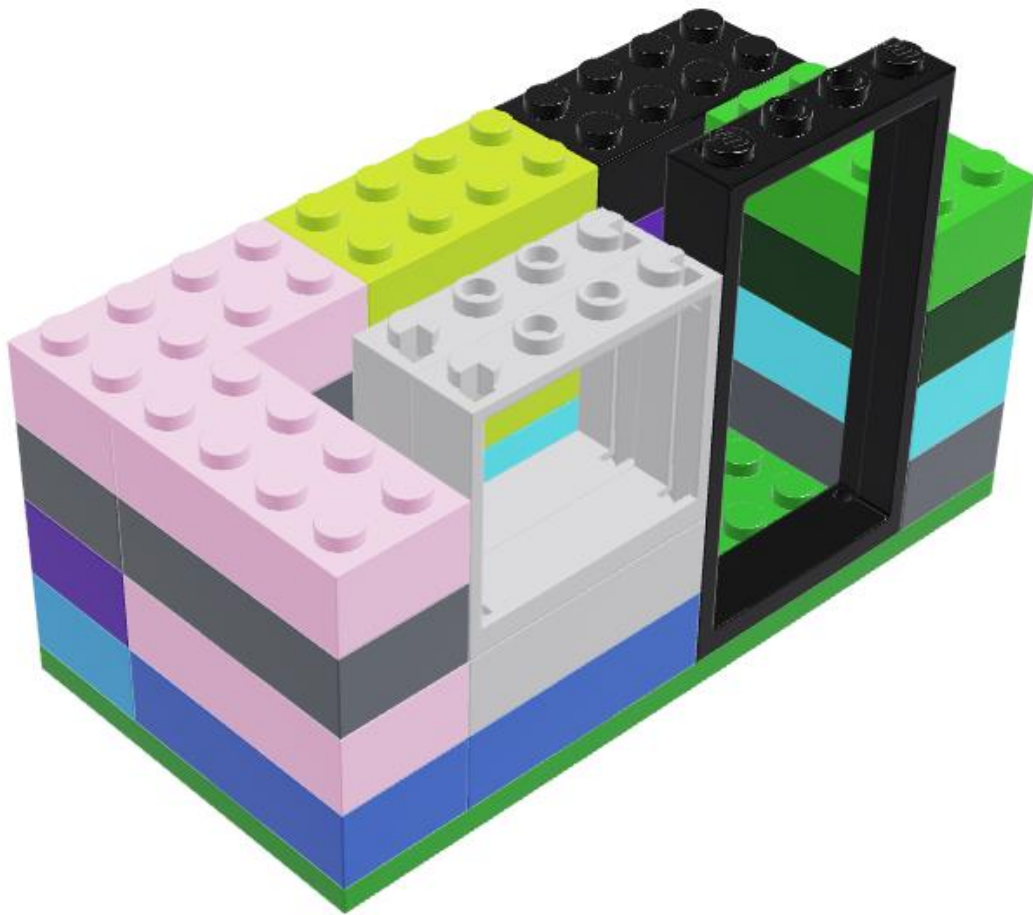

Place the window piece to the left of the door and continue building the next layer of bricks, following the same pattern as in Step 2.

### Step 5: Continue Wall Construction

Repeat Step 2 to add another layer of 2x4 bricks.

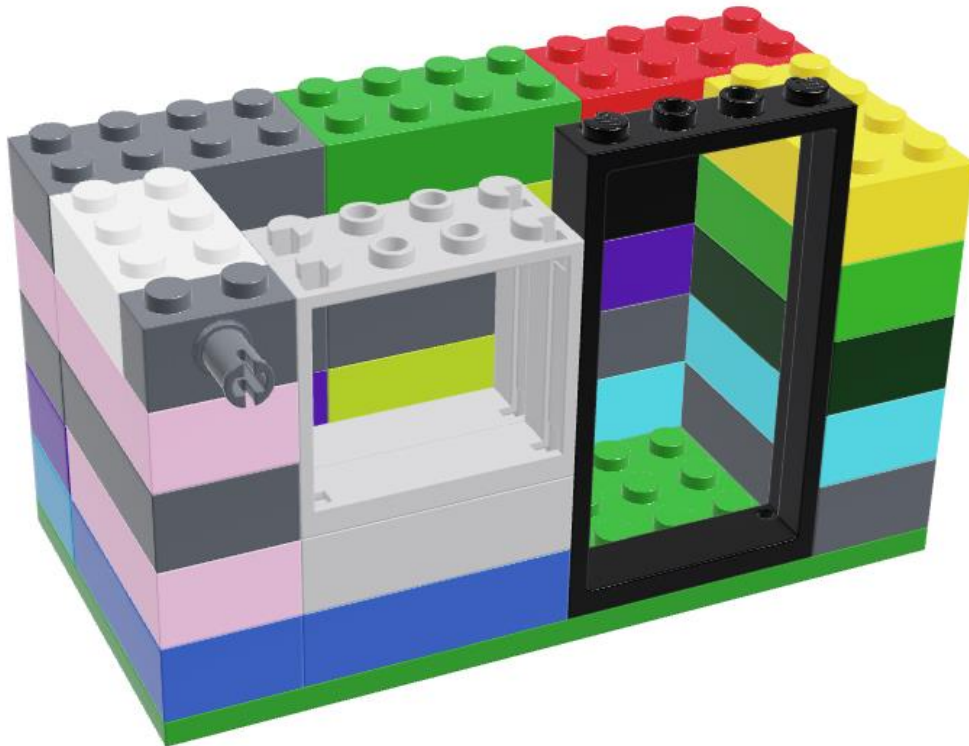

### Step 6: Reinforce the Wall Structure

To the left of the window, attach a 2x1 male connector piece with the protruding male connector facing outward.

Behind this block, place a 2x3 brick.

Fill the remaining spaces with additional 2x4 bricks.

### Step 7: Continue Wall Construction

Repeat Step 2 to add another layer of 2x4 bricks.

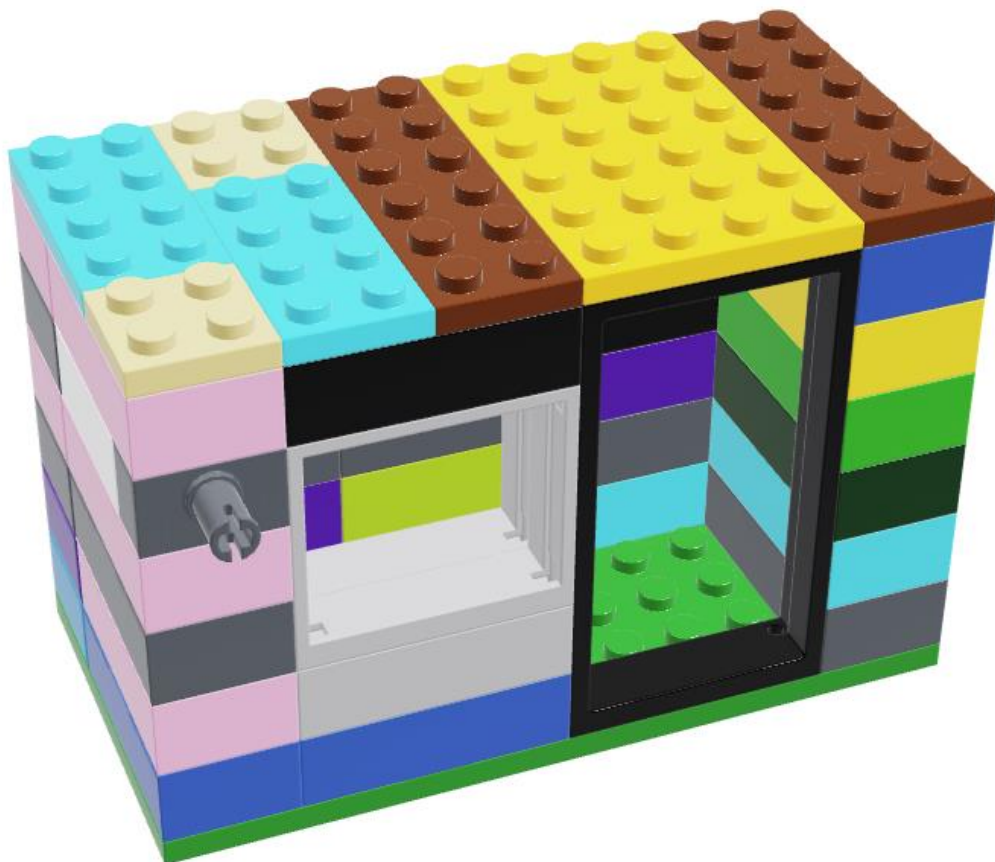

### Step 8: Build the Roof

Use 2 × 2x6 flat pieces.

Place a 4x6 flat piece between them.

Position 2x4 flat pieces opposite each other.

Fill in the remaining gaps with 2x2 flat pieces.

### Step 9: Assemble the Light

Connect the stud to the bottom of a connector piece.

Attach a 2x1 flat piece on top of the connector piece.

Secure a slanted piece to the side of the connector piece.

### Step 10: Build the Flower:

Attach a slanted pieces to a 1x1 connector piece, slanting them in opposite directions.

Repeat the step and stack the second piece on top.

Attach the leaf piece above.

Place the center flower piece on top.

Add the stud piece on top.

### Step 11: Build the Rail:

Arrange 1x2 railing pieces along the left edge of the roof in a C-shape.

### Step 12: Add the flower

Insert the completed flower onto the cross flat piece and place it in the upper right corner of the house.

### Step 13: Attach the Light and Enjoy Your Lego Home!

Attach the connector piece to the male connector piece beside the window, ensuring all components are secured. Your Lego Home is now complete!
